Health and Safety charter for precast concrete associations members of BIBM

Developing a zero-harm accident-free precast concrete industry

We, the undersigned:

- Agree to play our part in reducing the numbers of work-related deaths, injuries and ill-health in the national precast concrete industry we represent
- Agree to exchange accident case studies and best practice within the BIBM network
- Call on all employers to put health and safety at the heart of what they do and to take a common sense approach to health and safety.
- Will aim at reducing risk to health and safety of all stakeholders including factory workers, visitors and neighbours, sub-contractors, logistics teams, vulnerable road users, and construction site workers using our products
- Commit to debunking myths around health and safety that trivialise the impact of injuries, ill health and deaths on individuals and their families.
- Recognise the importance of health and safety in difficult economic times and the dangers of complacency.
- Pledge to work with our Government and our supply chain to develop provably an accident-free zero-harm precast industry
